1) The total morbidity during current pregnancy is:
   a- 18.7
   b- 34.5
   c- 50
   d- 41.3
   e- 27.7

   The answer is (d)

2) The most common cause of diarrhea is :
   a- E.coli
   b- Petrusis
   c- Rota virus

   The answer is (c)

3) The percentage of women who receive postnatal care is:
   a- 15
   b- 40
   c- 68
   d- 73
   e- 90

   The answer is (c)

4) All of the following are considered as attenuated life vaccines except:
   a- Measles
   b- Mumps
   c- Petrusis

   The answer is (c)

5) RAD stands for : Radiation absorbed dose
6) Which of the following is natural background radiation:
   a- Nuclear reactors
   b- Nuclear weapons
   c- Occupational exposure
   d- Industrial exposure
   e- Terrestrial

   The answer is (e)

7) Factory inspectors was the outcome of :
   a- World war 1
   b- World war 2
   c- Industrial revolution
   d- None of the above

   The answer is (c)

8) Risk assessment helps in:
   a- Identify the hazard
   b- Evaluate the risk
   c- Identify all affected by the hazard
   d- All of the above

   The answer is (d)

9) All of the following are true about diphtheria except:
   a- Can cause serious illness
   b- Kills 1 of 10 people infected with it.
   c- Has long incubation period.
   d- If not treated the child could die.
   e- Lives in mouth, nose and throat and can be spread by droplet infection.

   The answer is (c)

10) Which of the following considered as social factors affecting adolescent health:
   a- Economic
   b- Legal
   c- Religious
   d- Educational
   e- All of the above

   The answer is (e)

11) HSE in Britain is: Health and safety executive.
12) To compare your study with other studies : Consistency
13) Which of the following has the lowest sensitivity for radiation:
   a- Mucus membrane
   b- Bone marrow
   c- Lung
   d- Mature bone
   e- Optic lens

   The answer is (d)

14) Mechanical hazard? Slipping
15) Which one of following contains lead:
   a- Unleaded gasoline
   b- All types of paint
   c- Solid batteries
   d- Rodencitides
   e- All of the above

   The answer is (d)

16) Which of the following is right about heat stroke:

a- It is the same like heat exhaust
b- The skin of the patient is wet
c- It can be caused only from sun
d- Alcohol consumption is a risk factor
e- None of the above

The answer is (d)

17) Which of following is an indirect cause for maternal mortality:
a- Hypertensive disorder
b- Breast cancer
c- Preeclampsia
d- infection
e- None of the above

The answer is (b)

18) The most common cause of maternal morbidity worldwide according to the2003- WHO study :
hypertensive disorders
19) The most common cause of maternal morbidity in Jordan according to the 2005-WHO study is:
UTI (urinary tract infection)
20) Incidence rate and causality are used in which of the following studies:
a- Cross section
b- Cohort
c- Case control
d- Clinical studies
e- B&D

The answer is (e)

21) Having a cancer from workplace is considered as:
a- Chemical hazard
b- Biological hazard
c- Hazard from workplace which is biological, physical, chemical and psychological one.
d- None of the above.

The answer is (d)…. The cancer is neither risk nor hazard, it is harm.

22) Which study is used to find efficacy:
a- Cross section
b- Cohort
c- Case control
d- Clinical
e- B&D

The answer is (d)

23) All of the following rates are calculated per 1000 births except:
a- Neonatal mortality

b- Post neonatal mortality
c- Infant mortality
d- Child mortality
e- Under-five mortality

The answer is (d)

24) The percentage of children who die at first month is : 75%

25) From the following cohort study find the relative risk:

disease / weight	+	_
+	80	20
_	20	80

a- 16
b- 4
c- 0.06
d- Can't be known

The answer is (b)
RR = IR_E/IR_{NE} .... RR = (80*100/(80+20)) / (20*100/(20+80)) = 8/2 = 4

26) The most common developmental disabilities : ADHD
27) The percentage of the modern contraceptive use is : 42%
28) OSHA means:
a- Occupational safety and health act
b- Occupational safety and health of America
c- Occupational safety and hazard act
d- Occupational safety and hazard of America
e- None of the above

The answer is (a)

29) Which of the following is true about cosmic radiation:
a- It decreases with altitude
b- It is the shortest wave length ionizing radiation
c- Highest at equator
d- All of the above

The answer is (b)

30) Using radiation in food canning is:
a- Industrial
b- Occupational
c- Both industrial and occupational

d- None of the above

The answer is (b)

31) If you were a leader in an emergency room in the ICU, which is the best leadership style to have:
   a- Autocrat
   b- Participative

   The answer is (a) .... Not sure

32) Note : (the workplace standard is lower than the environmental standard)
33) Unity of command: when a group report to only one manager.

34) The odd ratio is 1.666, find the value of xxxxx :

		Cardiovascular disease	
		+	_
smokers	_	20	20
	+	25	xxxxx

a- 13
b- 15
c- 25
d- 41.65
e- None of the above

The answer is (b)
Here is a trick!.. the negative values(non smokers) are shown above the positive values (smokers) ! .. be careful!
(25*20/ 20*xxxxx=1.666) .... Xxxxx=15
