hay kol as2elet l2emte7an lle b7eb yshofhen wnshala lkol ykon mzabet....

- 1)EHEC----->all of the above
- 2)wrong about typhoid ---> verotoxin
- 3)E.histolitica(wrong) ----> liver cirrhosis
- 4)B.coli(wrong)--->axostyle
- 5)ascaris--->reach liver
- 6)wrong about hepatitis----> HEV has vaccine
- 7)about HDV--- > incomplete RNA virus
- 8)" +HBsAg" & " +HBeAg" ----> infectious & has the disease
- 9)right about HCV---> posttransfusion
- 10)Rota---> ELISA
- 11) wrong about Toro virus---> drug of choice rantidime
- 12)carries for HBV and has HDV---> HBeAg (((not sure)))
- 13)lower 1/3 cuboidal gland---> barret esophegus
- 14)enlargment of upper 1/3 of esophegus(mass)----> sqamus cell carcinoma
- 15) female with chronic rhaumatic arithritis start using NSAID & suffer from bloody stool----> acute erosive arithritis
- 16)singlet cell---> linitis plastica
- 17)lipase inhibitors----> steatrhea&vitamin k deficiency (more than one)
- 18)lowest RQ---> diabetic hyperglycemia
- 19)about defication---->parasympthatic to muscle of anus
- 20)mucosal block---> Fe
- 21)dont affect blood flow---> ICC
- 22)mass contraction (wrong)--->all day long
- 23)about pancreas secretion----> high Cl in slow secretion & enterokinase activate the secreted enzymes (more than one)
- 24) wrong about lipids--->digestion on brush border
- 25) right about proteins--->continue the last part of digestion inside the enterocytes
- 26)secretion of pancreatic enzymes by---> acinus
- 27)if food remain in esophigus----> secondary esophegeal contraction
- 28)Leptin (wrong)--->activation of feeding center
- 29) wrong---> beta-glycosidase is present in human secretion
- 30) urethra injury(wrong)--->superficial to scarpus fascia
- 31) wrong about tonsil---> blood supply from tonsillar artery from LINGUAL(fasial is the correct)
- 32)between lower and middle constrictor muscles----> internal larengeal nerve
- 33)not from parotid bed---> medial petrroid musle
- 34)not medial to sublingual gland---->stylohioid muscle
- 35)stab wound ti right iliac fossa---->L1
- 36)wrong about large intestine----> paneth cells
- 37) villi(wrong)--->lamina properia contain Brunner's glands
- 38)wrong about liver---> quadrate lobe drain into right hepatic duct
- 39) wrong about epiploic foramen : quadrate lobe superior
- 40) wrong about tendinous intersection----> attach to posterior border of rectus sheath
- 41) wrong about liver histology---> sinusoid contain unfenestrated ...

- 42) all origins to external muscles of tongue except---> pterygoid process
- 43) facial artery damage test---> clenching of teeth
- 44) wrong---> active chief cell contains canaliculi
- 45) vermiform appendix(wrong)---> inferior mesenteric artery
- 46) wrong about posterior relation of duodenum---> 4th part -- origin of mesentery & superior mesenteric artery
- 47) wrong statement about mesentery---> from L1 to right sacroiliac joint
- 48) wrong---> right medial gutter reach pelvis
- 49) wrong---> ligament of teritz attach to left crus
- 50) internal spermatic fascia from internal oblique muscle (wrong)
