- VZV vs HSV differ in : ability to produce generalized eruption
- Micro: rose spots...salmonella typhi, blue-green lesions..pseudomonas aeruginosa.
Anatomy: wrong statement...the parotid duct pierces the masseter muscle.
- muscle expression : X embryologically originate from the 3rd branchial arch
 - *sensation of the face : X buccul of the fascial nerve
 - *scalp : X occipitofrontalies attach to the pericranium medially
 - * middle meningeal A :X main cause for subdural hemorrhage
- *Ptergopalatine fossa communicate with nasal cavity by : sphenopalatine foramen
 - *falx cerbri : X straight sinus runs on its inferior "lower" border
 - *dura mater : X endosteal layer provide tubular sheath for the cranial nerves

- * at the peak of simple muscle twitch : sarcomere is shorter than
- *the tentorium : X its fixed border attach with ant clinoid process
- * IPSP open chemical K gated channels !!!!!!!
- * inferior sagittal sinus : sup . cerebral veins
- *cavernous sinus : X no connection with the veins of the face
- *sth about gluti ???
- *papilledema : X decrease the intracranial pressure
- *sup of sup gluteal nerve : X supplies medius as well as tensor fasciae latae
- * X in both femoral triangle & adductor canal : the femoral V located medially
- * unlocking II knee joint : lat rotation of femur on tibia
- wrong about cutaneous leishmania
- FGFR3 __ ACHONDROPLASIA
- blue sclerae ,hearing lost ,teeth misshapen __ OI
- wrong about Ewing sarcoma
- homer wright rosettes __ PNET
